

Key Knowledge

I need to know -

- some key environmental problems and some key religious teachings about the Earth.
- examples of green religious practice with ideas of their own.
- connections between beliefs about the earth and activist behaviour in different religions.
- the challenges facing the planet and responses from different religions.
- about the kinds of collaboration, activism and commitment needed to 'save the Earth'.

Key Vocabulary

Climate justice	finding solutions to the climate crisis that not only reduces emissions or protects the natural world, but that does so in a way which creates a fairer, more just and more equal world in the process	sustainability	the idea that humans must interact with the environment in a way that ensures there will be enough resources left for future generations
Prophet	one who declares publicly a message that one believes has come from God or a god	Tu B'shevat	the New Year of the Trees, and marks the start of spring in Israel
Corruption	dishonest or illegal behaviour especially by powerful people	activism	The action of using vigorous campaigning to bring about political or social change
stewardship	respecting the environment in which we live	khalifa	"successor", "ruler" or "leader"
